Fine Sports Flooring

WOOD & Co.
Fine Hardwood Interiors

In addition to residential and commercial flooring, our installers are experienced in specialized sports, dance, and multipurpose flooring. From university gym floors and racquet ball courts to large ballroom floors and residential exercise rooms they have installed them all.

Our licensed professional installers are superbly qualified to install traditional northern hard maple flooring over a wide variety of specialized floating floor subsystems—including: Connor, Horner, and other's anchored, floating, sleeper, and fixed-floating sub-floor systems.

We handle the job from the installation of the engineered sub-floor system through sanding, finishing, painting floor logos, and game striping.

We also regularly install synthetic and rubber track, weight room & sports flooring, as well.
