

Our Business is *Wood* — Theater

Fine Custom Cabinetry

WOOD & Co.
Fine Hardwood Interiors

Marrying old-world craftsmanship with today's technology.

We carefully marry old world craftsmanship with today's technology. With component rollouts, media storage, in-cabinet lighting, special hidden wire chases, remote control storage compartments, wiring side access doors, concealed speakers, seamless built in monitor housing, acoustical design considerations, etc... our cabinetry is designed for today's multimedia technology.

More than fine cabinetry, we are experienced in complete theater room design and construction, with all of the ingredients necessary to build state-of-the-industry theater rooms with unique styling. We

bring everything together, from the cabinetry, special lighting, acoustical sound deadening panels and fabrics to state of the art furniture and decorative architectural elements like pilasters, wall paneling, flooring, coffered ceilings, and more.

We also have an exclusive arrangement with local Home Theater technology specialists to bring the very best in theater and home-automation technology together with our experienced craftsmanship.
