*Fine Hardwood Doors*

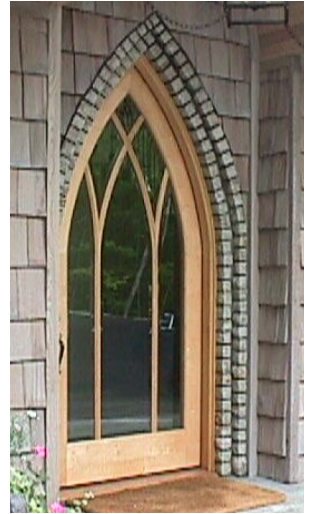

WOOD & Co.  
Fine Hardwood Interiors

Customers often tell us that, of all of the fine architectural elements in their home, they are the most proud of their doors. We are confident that your family will be proud of how our custom doors compliment your home. We know of no finer door available at any price.

Specializing in unique and one-of-a-kind custom doors, these are, without a doubt, some of the finest custom doors available. Our doors are

carefully handcrafted with stile-and-rail frame and panel construction, in keeping with the tradition of fine cabinetmaking.

We allow only select quality, hand-sorted, color-matched, cabinet grade hardwood - accepting no finger jointed or laminated butcher-block frame materials. Local artisans with many years of furniture and door carving experience perform the custom carving and relief work. Each door is painted, or stained and top-coated with a marine-grade catalyzed varnish in a top-grade furniture finishing facility.

Preferring Baldwin, Rocky Mountain and other equally high-quality locksets and hinges, only the finest hardware is used. These doors are designed and built to last hundreds of years in your home. For such a large step up in quality and distinction with so small of a price difference, we believe that their value cannot be matched.
